

## **Summit D&V obtained certification “ISO45001” International standard**

Summit D&V (hereinafter SDV), a subsidiary of Sumitomo Corporation Power & Mobility Co., Ltd. located in Hungary, obtained certification under the ISO45001, an international standard for an Occupational health and safety management systems on July 1, 2024.

ISO45001 is an international standard that specifies requirements for an occupational health and safety (OH&S) management systems. It provides a framework for organizations to manage risks and improve OH&S performance.

In April 2024, SDV examined its current operation from a health and safety point of view and decided to obtain the ISO45001 certificate as a result of the positive final result.

After the preparatory works, the audit took place at the end of June, where the auditors did not find any major nonconformity or minor issues, thanks to their dedicated team who made a huge effort to meet high standards. As a result, SDV could receive the certificate with scope for assembly and wholesale of auto parts that comply with system standards. It is valid until 30 June 2027 with the conduction of yearly surveillance audits.

All company members believe, that the introduction of the system will have many positive effects for the operation and workforce of SDV, like a more efficient and balanced workload with reduction of stress, better communication and collaboration between managers and employees, better performance and quality, and better employee satisfaction and motivation to increase the transparency and fairness of work processes.

SDV obtained the ISO45001 certificate, therefore SDV would continue to manage occupational safety and health, to maintain the safe and healthy workplaces.
