

Construction completion of Sendai Port Biomass Power Plant
in Sendai, Miyagi Prefecture

Sumitomo Corporation has issued a press release titled **“One of Japan's Largest Dedicated Biomass Power Plants Begins Commercial Operations in Sendai, Miyagi Prefecture.”**

This project involves the completion of one of Japan's largest biomass-only power plant at Sendai Port in Sendai City, Miyagi Prefecture. Sumitomo Corporation Power & Mobility supported Sumitomo Corporation in various aspects until the project's completion.

With an output of 112 megawatts and an annual net generated electricity of approximately 800,000 megawatt-hours (equivalent to the annual electricity consumption of about 260,000 households), this plant will enable the long-term, stable supply of renewable energy in the Tohoku region and contribute to the advancement of carbon neutrality.
